

POWERING CANADA'S FUTURE

Canada's current installed capacity:

3,426 MW

Across Canada, electricity generated from wind is already powering almost 1 million homes and businesses in a clean, reliable and efficient manner. With Canada's unparalleled wind resource, there are still opportunities to do more to maximize the economic, industrial development, and environmental benefits associated with wind energy for Canada.

- 950 MW of new installed capacity in 2009
- 2009 has been a record year for wind energy development in Canada
- Wind developments operating in every province for the first time ever in 2009
